

A National Alliance Has Now Formed To Fight Multinational Mining Giant CEMEX.

**Governor Schwarzenegger, Senators Feinstein and Boxer:
Please help us protect our families and California's environment.**

Mounting environmental and public health concerns have prompted an unprecedented alliance of city and community groups to oppose CEMEX mega-mining operations. A real threat lies here in California that demands attention:

- A 69 million ton mega-mine proposed for LA County will exceed historic mining levels by 16 times—**that's 1,600%**!
- Significant air quality threats for our families and children—**can exceed maximum risk** for new toxic pollutants in the air by 250%
- Massive increases of truck traffic on local roads and highways—up to **1,164 big truck trips** every single day
- Devastating fish and wildlife, including protected, endangered species

Supporting the business community, preserving the environment and protecting our quality of life are not mutually exclusive!

More than 8,000 business, environmental and community leaders have joined with the City of Santa Clarita—ranked as the Best Place to Live in California by *CNN/Money Magazine*—to stop this mega-mine project. Adding more weight, a national alliance has now been mobilized to fight CEMEX operations across the United States.

CEMEX needs regional and state permits for its California mega-mine project. You have an opportunity now to make a difference.

We need your help before it's too late.
